### Career history

I'm A retail manager with 7 years of management experience, looking to change careers into the world of web. I completed my Diploma of Web Development at St Leonards while managing at Woolworths. After studying, I decided to pursue a management pathway at Woolworths, instead of getting a web developer job. Fast forward to today, I'm back into web development, seeking a new challenge. I've spent the better half of 2022 learning as much front-end tech as possible. If you need an eager-to-learn, passionate and motivated developer for your team, look no further.

### Experience

I have been teaching myself javascript, typescript and front-end frameworks such as React. I've built many projects and apps all from scratch to learn as much as possible. My major project is a Spotify web player, using their official API. If you haven't already, please check out my projects section on my site <https://adamdgithub.io/#Projects>. In 2013 at Tafe I learned PHP, HTML5, CSS3 & MYSQL. I built a web app which had account creation, login, logout, product management, security measures and data validation.

### Personal summary

Keen eye for design and detail. I love creating beautiful yet simple designs for ease of use. Eager to learn and improve my skill-set, happy to learn new frameworks or languages as well. Experience working to strict time frames and budgets daily within Woolworths. Team rostering, organisation, customer service, training and setting expectations/goals for team members. Strong time management and organisation skills.
