Electoral Official - 2012

Skills

Javascript / Typescript
HTML / CSS / SCSS
React / Svelte / NextJS
PHP
Prisma ORM
SQL databases
API endpoints
Web-sockets
Testing libraries
Adobe Photoshop

Experience

Full Stack Development

- Built a fully functional e-commerce website using PHP, MySQL, HTML5, CSS3 and JQuery. Featured Log-in, authentication, password encryption, admin panel, product management, shopping cart and a checkout.
- Currently building a NextJS full stack Pokemon app. Supports Google account login and Pokemon search as you type filtering

Front End Development

- Complex Spotify clone built with React. Features custom drag & drop with auto-scroll when modifying playlists, pop-up feedback messages when making actions such as editing playlist details, skeleton loaders, tooltips on buttons, search as you type with delay to limit API requests.
- Web based file system, add files, delete files, open and close folders to hide/show folder items.
- Simple web shop product page with pagination
- Weather app, uses javascript geo-location and a weather API to get current location based weather events.
- Todo App, stores items in local storage

Javascript Development

- Picture puzzle game, array shuffling, array manipulation, user uploaded images converted to base-64 string, html canvas drawing to resize and cut images into tiles.
- Calendar date range picker. Simple but powerful calendar, allows selection of dates, either a single date or between a range. Highlights current day and month, only renders months as you cycle through them.
- Wordle clone, keyboard support, gives you a new word every day.
- Content slider, scalable to any screen size, infinitely loops through images seamlessly.
- Table data filtering, sort by table heading, ascending order or descending order.
- Web scraper, scrapes google for song lyrics using Puppeteer.
- Canvas drawing app, brush size changer and colour picker

Interests

Weight lifting
Web development
UI / UX
Graphic design
Building computers
Swimming
Running
Bushwalking
Cooking
Video games

Management

- Performance management to ensure team members are meeting expectations and working to carton rates.
- Training team members to work safely and understand their daily tasks and expectations.
- Delegating tasks to team members around the store.
- Communicating with all departments, ensuring daily routines are completed on time.
- Interfacing with customers to resolve complaints or product refunds.
- Handling product recalls in a timely manner for customer safety.
- Rostering to strict weekly budgets.
- Product inventory management, ensuring stock on hand is correct and shelf capacities are accurate.
- Responsible for all end of day routines for store closure, including money handling.

Achievements

1. Over 5000 hours management experience across 7+ years
2. Produced evidence from security footage to assist police with successfully charging criminal activity
3. Developed a custom multi-browser supported drag and drop playlist feature, with auto-scroll behaviour
4. Created a custom volume scrubber/control with local storage to save last used volume

Career Objective

Motivated web developer looking for a junior web developer role where I can work alongside experienced developers to expand my skills and challenge me with new and interesting problems.
Passionate about design and user experience.
